<b>Research</b>	Looking further into a subject
<b>Compare</b>	Look at similarities and differences between two or more objects or

### Key Facts

Historians divide up time so that we can get a sense of the order in which things occurred.

1960 is 60 years before our time now.

Toys today are different to toys made and used during the 1960's.

Toys in the 1960's were not made with as much technology as today's that are made today, as the technology was not as advanced in 1960.

Some toys that were made and popular during the 1960's are still brought today in shops and popular—toys such as Barbie.

### Tim Berners-Lee

Tim Berners Lee was born in 1955.

Throughout his adult life Tim created many electronic ways of storing and sharing data and information through technology.

Tim created a web of servers connecting all computers around the world. In addition, he also developed the first browser and first web server—he created the World Wide Web.

Overall, Tim had a humongous impact on toys as this meant that more technology was now able to be built into toys than before.
