

Dear Parents

I hope that the home learning is going well and that everyone is safe and well too.

For this week's maths, I would like you to continue using the following link to access the learning.

<https://whiterosemaths.com/homelearning/year-3/>

Each day has a lesson which includes a video to help with the teaching along with activities which can be printed out. **If printing is a problem, the activities can be completed using pencil and paper.**

Please work on Summer term week 1 which works on equivalent fractions and comparing fractions. Once again it may be beneficial to look at the year 2 week two which revises what the children have previously covered.

<https://whiterosemaths.com/homelearning/year-2/>

Please aim to cover one lesson a day.

It would benefit your child greatly to have a thorough knowledge and instant recall of all of their multiplication tables in preparation for their return to school. These can also be practised using TTRockstars. Each child has their own individual login code.

Have fun and keep learning.
